The protracted humanitarian situation in the DPR Korea is largely forgotten on the global agenda. The country continues to suffer from food insecurity as well as limited access to health and water, sanitation and hygiene (WASH), resulting in chronic malnutrition and poor health outcomes. An estimated 18 million people are in need of some form of humanitarian assistance. Of these, the humanitarian community is aiming to reach 13 million beneficiaries, focusing on Food Security, Nutrition, Health and WASH.

\$122

In 2016, the humanitarian community is requesting US \$122 million to
address critical needs in the DPR Korea.
